

The DEL Difference

2019 Q4 Edition

Thermoformed Overcapping and Lidding

Many companies are making the switch to thermoformed overcaps/lids versus injection molded caps and lids. Thermoformed overcaps/lids are less expensive, but can be challenging to feed and apply to containers. Over the last 40 years DEL has developed a variety of feeders and applicators that work efficiently for thermoformed caps and lids.

Contact us today at sales@delpackaging.com for more information! Find more information at www.delpackaging.com

Experience the DEL difference and you'll be in good company.

Manufacturing packaging machinery since 1938.
